

CREATE, INSERT, UPDATE, DELETE & COMMENTS

Step 1: Create a Table

None

```
-- Create a table named students
```

```
CREATE TABLE students (  
    student_id INT PRIMARY KEY,  
    student_name VARCHAR(50),  
    age INT,  
    course VARCHAR(50),  
    city VARCHAR(50)  
);
```

Step 2: Insert Records

None

```
-- Insert records into the students table
```

```
INSERT INTO students VALUES  
(101, 'Rahul', 21, 'Data Science', 'Chennai'),  
(102, 'Anu', 22, 'AI & ML', 'Bangalore'),  
(103, 'John', 20, 'Web Development', 'Mumbai'),  
(104, 'Meera', 23, 'Data Science', 'Hyderabad'),  
(105, 'Priya', 21, 'Cyber Security', 'Delhi');
```

Step 3: View the Table

None

```
-- Display all records  
  
SELECT * FROM students;
```

Step 4: UPDATE Statement

Update a student's city

None

```
UPDATE students  
SET city = 'Pune'  
WHERE student_id = 103;
```

Update a student's course

None

```
UPDATE students  
SET course = 'Data Analytics'  
WHERE student_name = 'Anu';
```

Update multiple columns

None

```
UPDATE students  
SET age = 24,  
    city = 'Kochi'  
WHERE student_id = 104;
```

Step 5: DELETE Statement

Delete one record

None

```
DELETE FROM students  
WHERE student_id = 105;
```

Delete all records

None

```
DELETE FROM students;
```

Step 6: SQL Comments

Single-line Comment

None

```
-- Display all students  
  
SELECT * FROM students;
```

Multi-line Comment

None

```
/*  
This query displays  
students enrolled in  
Data Science  
*/  
  
SELECT *  
FROM students  
WHERE course = 'Data Science';
```
